

EZ·COVER

The Best Single User
Manual Safety Cover

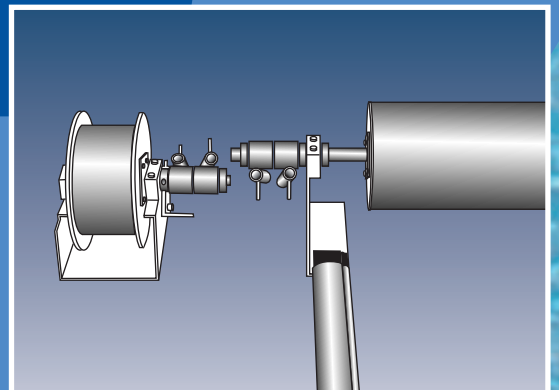

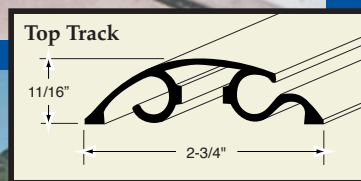

EZ Cover is a product of Aquamatic Cover Systems

A New Concept in Easy-to-Use Manual Safety Covers

Save Lives • Save Energy • Keep Pools Clean

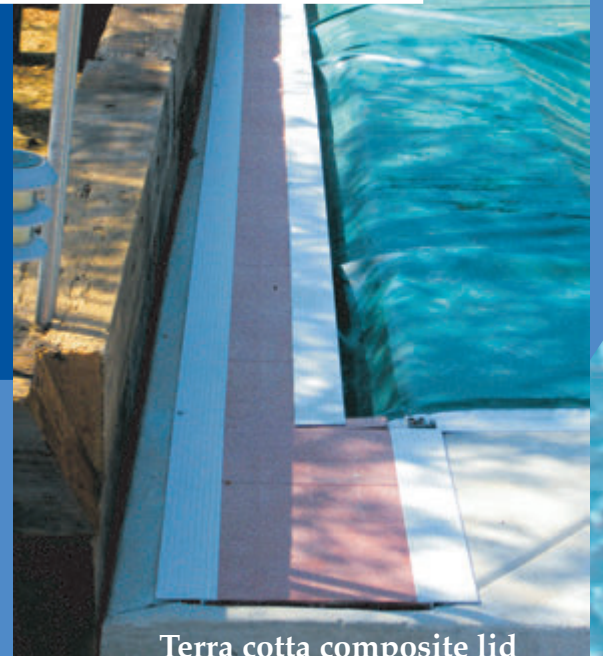

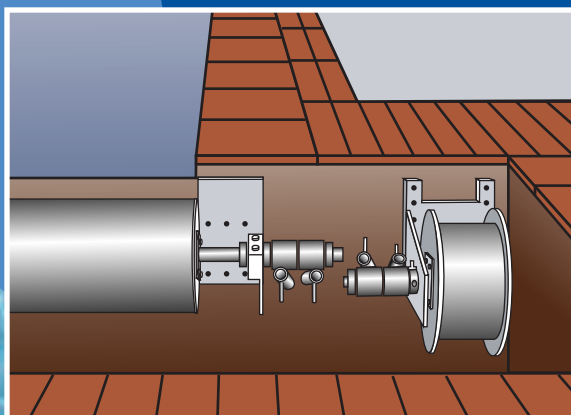

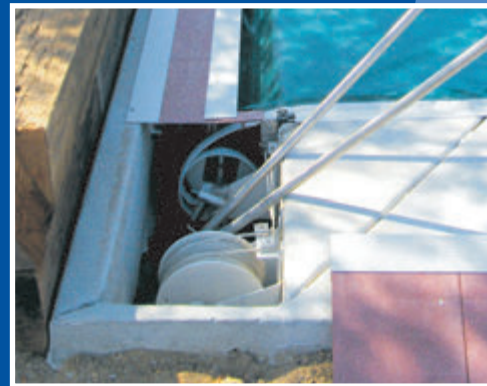

The Best Single User Manual Safety Cover

Now you can have all the safety and cost savings of an automatic pool cover at a cost effective price. EZ Cover looks and moves like an automatic cover but without the hydraulic mechanism, at about half the price. The effortless operation takes on average about 70 seconds to open and/or close the cover. It's so easy you'll use it daily to keep your pool safely covered anytime it's not in use. EZ Cover also comes complete with a seven year fabric warranty and lifetime mechanism warranty.

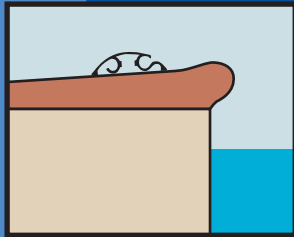

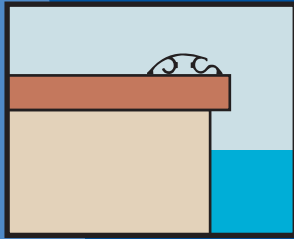

Features

- Durable maintenance free operation
- Opens and/or closes in 70 seconds on average
- Looks like an automatic cover
- Moves like an automatic cover
- Exceeds ASTM standards
- No electrical hazard near the pool
- Excellent seven year fabric warranty

Aquamatic Pool Covers are suitable for most Pool Shapes

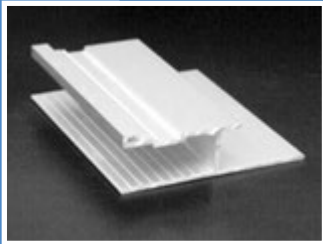

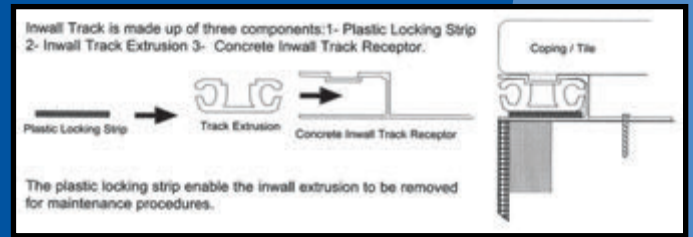

Dimensions shown are for pools up to 40' long

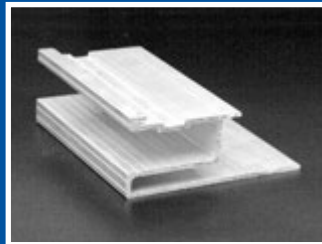

Encapsulated "In-wall" Receptors for Concrete Guniting and Fiberglass Pools

In-wall tracking is ideal for any indoor or outdoor installation. The track receptor is installed on top of the bond beam during the pool construction prior to the coping installation. Coping or other masonry material are placed directly on top of the track receptor.

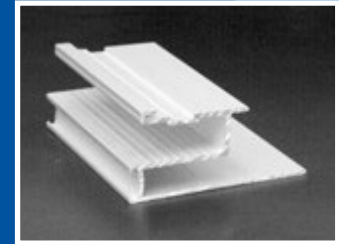

In-wall #1

- Concrete / Guniting / Fiberglass Pools
- Ideal for raised beam details
- For use with non-standard coping, brick/tile pavers and stone

In-wall #4

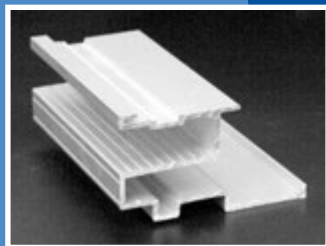

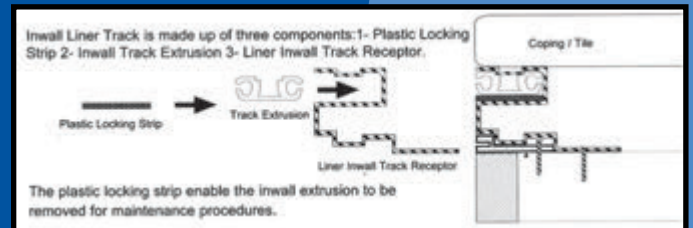

In-wall #5 w/Fiber optic Receiver

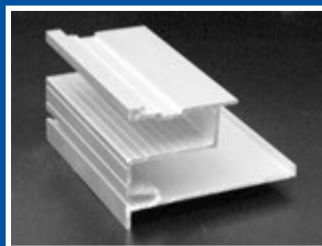

- Snap in fascia to finish off at end of pool
- 6063T-5 anodized aluminum
- Can be color coated to match surround

Encapsulated "In-wall" Receptors for Vinyl Liner Pools

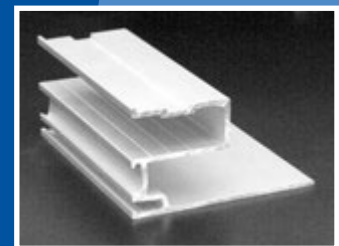

This extrusion can be used on any liner type pool. Steel, polymer or wood wall. The track receptor is installed at the time of the pool construction on the top of the pool wall. Copings or other masonry material are placed directly on top of the track receptor.

In-wall #2 without Liner Bead

In-wall #3 with Liner Bead

In-wall #6 w/Fiber optic Receiver and Liner Bead

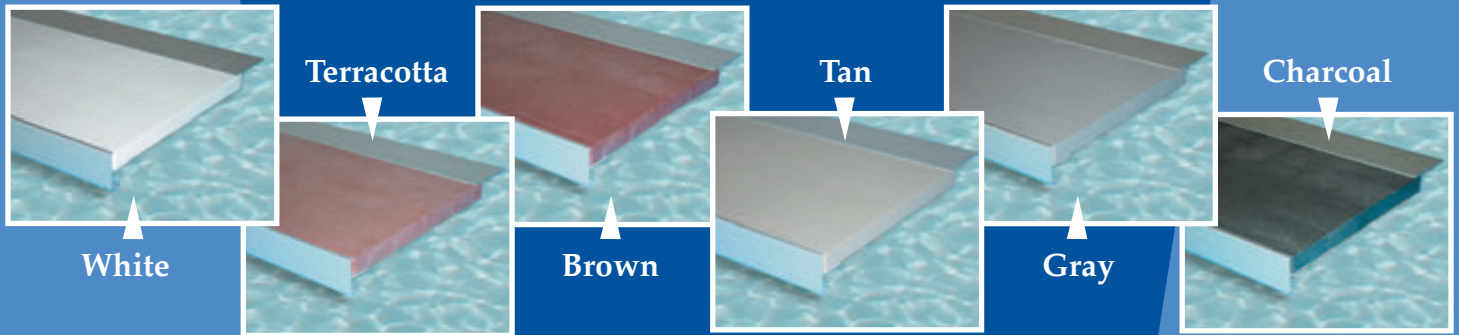

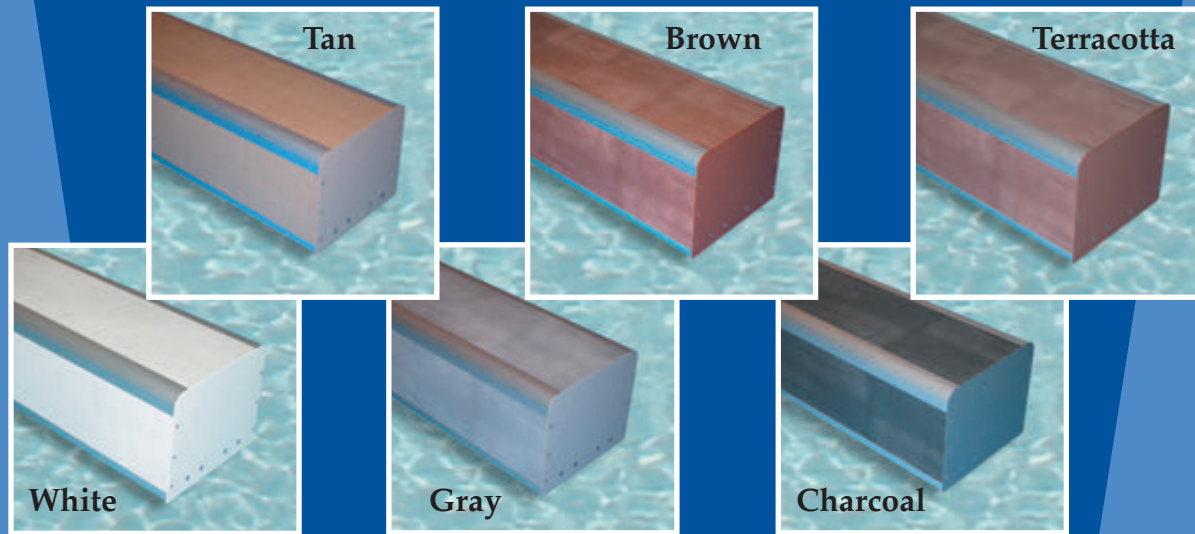

- Vinyl Liner Pools
- Fits standard perimeter fiber optic lighting
- For use with non-standard coping, brick/tile pavers and stone

- Snap in fascia to finish off at end of pool
- 6063T-5 anodized aluminum
- Can be color coated to match surround

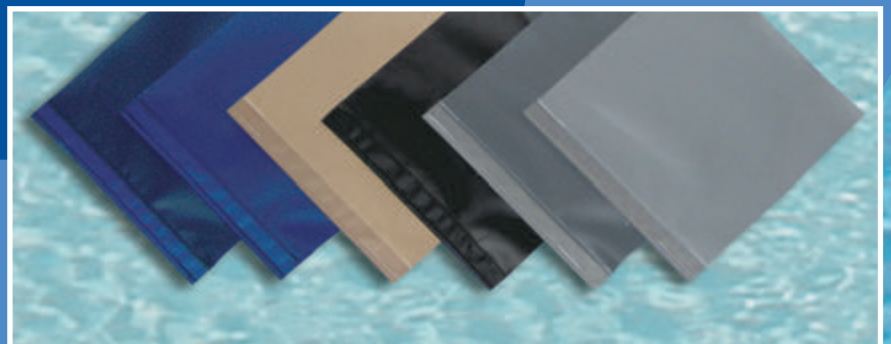

IMPORTANT: When using In-wall Receptors, there will be an increase in finished elevation.

Advantages and Benefits of Aquamatic's EZ-Cover

Convenience

The EZCOVER is the only manual safety cover that can be opened and closed by one person in one comfortable standing position. No rope to pull, drills to engage or cranks to manhandle. It covers and/or uncovers most pools in 70 seconds on average.

Durability

The EZCOVER mechanism is made of quality components including extensive use of stainless steel, so durable is the EZCOVER, that it is backed by a limited lifetime warranty.

Convertibility

The EZCOVER can easily be converted to the HydraMatic automatic. The EZCOVER will reduce electricity, water savings and chemical consumption. A computerized automatic cover pump is included to remove standing rain water.

Safety

The EZCOVER exceeds ASTM F1346-91 Standards for Pool Safety.

Installation

The EZCOVER can be installed on most pool shapes (consult your dealer or call the factory to see if your pool will accept a cover) it is designed and engineered for the Do it yourself installer.

Warranty

The EZCOVER has the longest most complete warranty in the industry. A seven year limited warranty on the cover, and a limited lifetime warranty on the mechanism.
